1) The terminal disclaimer filed on 10/30/2006, disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of patent resulted from application 11/020,553, has been reviewed and is accepted.

The terminal disclaimer has been recorded.

2) The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is that the cited prior art does not show: a paper product having a plurality of sheet layers of structure claimed, and having bridging regions of a length-to-depth ratio claimed, said bridging regions obstructing ridges and valleys of a surface of each paper sheet layer from mating with said ridges and valleys of said surface of adjacent paper sheet layers inhibiting nesting between each paper sheet layer as a stacked or wound product (claims 77, 111); a wet method of making a paper product that includes embossing said paper to form bridging regions of length-to-depth ratio claimed, and wounding or stacking the paper where said bridging regions are obstructing ridges and valleys of a surface of each paper sheet layer from mating with said ridges and valleys of said surface of adjacent paper sheet layers to inhibit nesting between each paper sheet layer (claim 96).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
